Product: **Washing powder detergent with disinfection**

Date of issue: 15/03/2018

This washing machine laundry powder, with active oxygen activator, is more effective on dirt and stubborn stains also at low temperatures. The presence of active oxygen ensures a complete hygiene and helps to remove bacteria and fungi. Heavy duty powder detergent is produced by spray drying tower process, giving a product readily and highly hydro soluble also at low temperature, with a very effective soil removal.

### Chemical composition:

15 - 30%	Sodium carbonate	Water softening builder
	Sodium Percarbonate	Oxygen based bleach
5 - 15%	Zeolite	Sequestering agent
Inf. 5 %	TAED	Bleaching activator
